Hi. As a full-stack developer, I have rich experience in React.

Also, I mastered react/redux-saga, react-hook, react-router, and many other useful react.js libraries.

Furthermore, I am familiar with ancharts library.

I am sure that I can do your work perfectly.

Please contact me and let's discuss more details about your project.

Best Regards!

▼ hire

I am looking for a React.js developer who has rich experience for 3+ years.

If you're okay to get going Face to Face technical interview with me, don't hesitate to apply to this position.

This position is a long term if your skills look cool.

I am an experienced full stack developer so don't apply if you're not a professional React.js developer.
